## REPORT OF WELLS FIRE DEPARTMENT

To the Citizens of Wells:

I hereby submit to you the Third Annual Report of the Wells Fire Department. Since our incorporation May 10th, 1922, we have answered to 66 alarms, of which three were out-of-town calls.

The loss of these fires total \$73,650.00, with a total insurance carried of \$46,850.00. This year we have had 27 alarms (from Jan. 1, 1924 to Jan. 2, 1925) with a loss of \$14,250, and insurance of \$12,350.

We have at present in the department 20 members in active service; our equipment is in excellent condition, considering the length of time it has been in service, and at all times it is overloaded. This is something that cannot be helped as the apparatus is not heavy enough for the load that has to be carried at all times. We have had to purchase a new roof ladder to replace the one lost at the fire of June 6th, 1924. Our other supplies have been necessities such as soda, acid, acid-bottles, etc. We have **on hand at present, 950 feet of rubber lined hose, 100 lbs. soda, 8 gallons acid, 24 acid bottles, and 200 feet chemical hose.**

Our greatest handicap at a large fire is a Pumper. We have had the experience on several occasions wherein if the department was equipped with a Pumper the loss from fire would have been depreciated from 50 to 75 per cent. I suggest that for better protection and less losses from fire, that Pumper of reasonable price and efficient capacity be purchased in the near future. There is also a need of several hydrants as in some localities they are so far apart that in case of a fire there would be a delay for want of more hose which would mean a greater loss of property.

The following is a report of fires that the department has answered, giving date, location, description, name of owner, cause and loss:

1924

Apr. 16—Post Road; grass; D. F. Rand; bonfire; none.

Apr. 16—Maryland Ridge; grass and barn; Abbie Littlefield; bonfire; \$3500.

Apr. 27—Kennebunk; out of town call; woods.

May 5—Post Road; grass; F. E. Rankin; bonfire; none.

May 5—Depot, B. & M.; woods; C. Cobb; unknown; none.

June 7—Rear Depot R'd; bungalow; M. Blunt; defective chimney; \$2000.

June 7—Depot Road; wood dwelling and barn; Jennie Mildram; sparks from M. Blunt fire; \$100.

- June 10—Sanford Road; woods; W. C. Brown and M. R. Clarrage; sparks from locomotive; none.
- July 4—Sanford Road; wood dwelling; Francis Nichols; unknown; \$5500.
- July 19—Depot Road; wood depot; Boston & Maine R. R.; sparks from locomotive; \$800.
- July 30—York Harbor; out of town call.
- Aug. 2—Depot Road; grass; Boston & Maine R. R.; sparks from locomotive; none.
- Aug. 10—Sanford Road; false alarm.
- Aug. 10—No. Berwick Road; woods; E. Allen; unknown; none.
- Aug. 10—No. Berwick Road; woods; E. Allen; started anew; none.
- Sept. 8—Shore Road; Ogunquit Hotel; N. P. M. Jacobs; defective chimney.
- Sept. 14—Post Road; wood building; A. A. Allen; explosion of oil stove; \$500.
- Sept. 25—No. Berwick Road; wood barns; F. Sherburne; unknown; \$3900.
- Oct. 14—Beach Road, Eldridge Corner; grass; H. Ridley; bonfire; none.
- Oct. 23—Sanford Road; woods; R. Annis; sparks from locomotive.
- Oct. 31—No. Berwick Road; woods; B. Littlefield; sparks from locomotive.
- Nov. 7—Ogunquit Beach; wood store and dwelling; Patric J. Casey; unknown.
- Dec. 28—Post Road; wood dwelling; Frank Higgins; unknown; \$900.
- Dec. 30—Depot Road; wood dwelling; L. Allen; defective chimney; none.

1925

- Jan. 2—Depot Road; wood dwelling; H. Caine; overheated stove; none.
- Jan 12—Sanford Road; wood dwelling; Matthews; overheated stove; none.

In closing I desire to thank the members of the department, also the citizens of the Town who have aided us at the above fires.

Respectfully submitted,

FRANK F. ABENDROTH, Chief.

## REPORT OF THE WELLS BEACH HOSE COMPANY

To the Citizens of Wells:

In submitting my report of the year 1924, I would say that we have not been as fortunate in regards to fire as in years past, having been called sixteen times. Most of them, however, were brush and chimney fires. On Nov. 7 the Casey House was burned at Ogunquit Pines, the first house we have lost since the Hose Company was organized 15 years ago on Wells Beach, a record any company may feel proud of. During the year the cost of the department has been more than in past years on account of a new battery, spot lights, and other things we had to have. I have tried to get along as cheap as we could and have only gotten what was needed. For the past two years the Town has voted to have the waterpipe extended on Atlantic Avenue and install two more hydrants; also one more between Mrs. C. O. Littlefield's and the cottage of the late J. A. Hayes. There has been nothing done. Now it seems as if the Town and Water District are making a sad mistake as there are over 100 cottages beyond the last hydrant and the river that are not protected. If a fire ever starts at that end of the beach and the wind is right nothing will stop it.

Thanking the citizens and the company for their help, and wishing them the best of success.

Respectfully,

E. B. STUDLEY, Ex-Chief.

## REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the Superintending School Committee of the Town of Wells:

I herewith submit for your consideration the annual report concerning the condition of the schools for the year ending January 1, 1925.

## TEACHERS

The names of all teachers serving in the town, the length of service, and salaries will be found in the statistical report given at the end of the school report.

The losses among our teaching force for the past year were small as compared with previous years. There was an exchange of six teachers at the opening of the fall term of 1924. Two of these had previous experience in teaching and three were normal trained.

My impressions of the teachers, the spirit of their endeavor, and the character of their work are that they represent a corps of faithful and efficient educators, and that they are giving excellent service to the town.

Three teachers, Misses Ethel Weymouth, Marion Keniston, and Leona Sullivan attended summer school. Considering the heat of summer and that teachers are often at this period of the year

tired from their school activities, it is a commendable and praiseworthy spirit that prompts them to spend time and money in special educational pursuits as a means of increasing technical efficiency. It is anticipated that more of our teachers will take advantage of the summer term of training in 1925. It is logical and good business to offer promotions, or increases in salary to those who so improve themselves.

The character of teaching in our Maine schools is destined to be improved, especially in the more rural sections of the state. In 1923, the state legislature passed a bill requiring untrained teachers to improve themselves educationally by attending summer schools, or state normal schools. If this regulation is enforced it is reasonable to believe that within a short period of years practically all members of our teaching force in the state of Maine will be classified as trained for their work.

### HEALTH CONDITIONS

Health conditions for the first of the school year were good. Late in the fall term, many cases of chicken pox developed, interfering somewhat with the school attendance. A medical examination was made of the children in each school during the year, their condition catalogued, and parents notified of defects to be corrected. With the correction of such defects as enlarged glands, tonsils, vision, etc., it has been observed in several instances that children recover position in their classes and make better progress. In a few cases warnings of defects needing medical attention have been disregarded to the continued detriment of the children. May I urge that we cooperate with our physicians for the best welfare of our children?

More attention is being given to the physical needs of children while at school, by endeavoring to correct and improve such matters as poor ventilation, inadequate distribution of heat, lighting, that it may be received from the rear and left side of the child, also by providing a better type of seat and desk when making a new purchase. These things are carried out as far as our funds will allow.

In several schools hot noon lunches are prepared without interference with the regular work. Much can be said of the benefits derived from serving hot lunches. It has been found that children improve in health, and maintain a higher average in work when it is possible for them to obtain hot food at noon.

Physical drills and various exercises are given daily to improve bodily development and stimulate correct growth. Health projects of a various nature are in use both indoors and on the school

grounds. New health readers have been introduced especially in the lower grades.

### SUPPLIES AND EQUIPMENT

Formerly the supply account has provided not only such supplies as pens, ink, paper, etc., but school furniture, maps, chemicals for the high school, typewriters and other appliances of a permanent nature. The State Department of Education has ruled that the more permanent fixtures must henceforth be classed as repairs, or at least not drawn from the Supply Account. This does not imply that the appropriation should be reduced as the needs for school supplies each year are numerous. It will be noticed that there is an overdrawn account for school material even though we have tried to keep within the appropriation and purchased only necessary supplies.

### CONVEYANCE

Several conveyances are supported by the town to assist children who have long distances to travel in going to school, or to centralize schools. Of late, safety for pedestrians on our main highways has become a matter of grave concern especially for little children who have a long distance to travel. With this situation in mind, a conveyance was allowed on the Sanford Road and to Division 17 where there are a number of small children passing along a road of heavy traffic.

We were fortunate this year in securing the services of the Kennebunk, Ogunquit and York Bus to transport children to and from school at Wells Corner. This conveyance has everything necessary for comfort, protection and safety for pupils and is proving a very satisfactory means of transportation. It is hoped that it can be maintained and operated through the most severe months of the winter season.

### REPAIRS

Repairs and improvements contemplated a year ago have been carried out, and even more accomplished than was planned. Shortly after the conclusion of the annual town meeting, it became evident that the heating system in use at Div. 2 would be absolutely inadequate and unhygienic for another season. For a long time it had been necessary to force the heater in order to secure any results, and in very cold and blustery weather, conditions in the rooms were unbearable. The waste of fuel, failure to obtain warmth and consequent exposure to children and teachers made imperative the installation of a new heating system which has provided sufficient warmth. Ventilators have not been com-

pleted, or painted. The bill for this improvement has not been paid in full.

The school house at Highpine was remodelled within, walls and ceiling tinted, seats and desks varnished, new floor laid and four new windows added to increase the lighting in the room. A jacket of sheet iron was placed about the box stove. This jacket not only protects children seated near the stove from the intense heat, but establishes a moving current of air which insures more even heating of the entire room. Ventilators were installed in the toilets in compliance with state regulations. New slate blackboards are needed for this school.

The school house at Division 12 was shingled on both sides. The school house at Division 16 was shingled on both sides and the windows and sashes drawn and painted. The school house at Division 10 was painted with two coats of Monarch white lead paint, on the exterior, and within seats and desks were varnished, walls and ceiling tinted with several coats of muresco in a cream shade. Wainscoting and furniture were varnished. These improvements transformed the appearances of these buildings much to the delight of the pupils and teachers.

At the high school building a one-inch galvanized pipe was laid five feet down, connecting the mains to the high school building. This alteration insures an adequate supply of water at all times for both high school and grammar school.

Cabinets to protect chemicals and physical apparatus were made twice their original size in order to properly care for the laboratory material. Three typewriters were renewed in accordance with a previous agreement to obtain a special rate. A new and improved system of bookkeeping was introduced. The foundations of both the high and grammar school buildings were regraded and cemented wherever needed. Several other urgent minor repairs were made. A few new seats and desks were purchased for the high school and Ogunquit Village school.

Much can be done to improve the grounds about our school buildings. Special mention of the grounds about the high school building will be found in Principal Larrabee's report. I believe the citizens' civic pride should be sufficiently great to have set aside a sum of money to be used in grading the yard, banking the foundations of each school, and in building a substantial fence on the south side of the high school building.

## ESTIMATED SCHOOL BUDGET

School Year Ending 1926

Appropriation for schools, 1924-25

\$15,200.00

Necessary increases	400.00
	<hr/>
	\$15,600.00
Increases in transportation	500.00
Deficit for year 1925	600.00
Deficit for 1926 (estimated)	600.00
	<hr/>
Necessary appropriation for School Account	\$17,300.00
Text Books, necessary appropriation	750.00
Supply Account, necessary appropriation	800.00
Repair Account—Due an unpaid bill for	
Heater at No. 2	\$700.00
General and imperative small repairs	575.00
Shingling Div. 2 and improving interior	300.00
Painting Div. 12 inside and outside	225.00
Improving basement at Div. 5	100.00
Furniture, as seats, etc.	100.00
	<hr/>
Necessary appropriation	2,000.00
Superintendence, necessary appropriation	800.00
High School Transportation, necessary appropriation (over 50 students receive)	\$1,200.00 or 1,500.00
High School Graduation, necessary appropriation	100.00
Insurance, Flags and Water Rent, necessary appropriation	300.00
Medical Inspection, necessary appropriation	300.00
Average rate of taxation in support of schools in the state:	
	School Rate      Municipal Rate
Town of Wells	.007              .042
Average of State	.011              .042

In the town of Wells 25 per cent of money raised by taxation is expended in support of schools. In many towns 35 per cent to 50 per cent of money raised by taxation is required for support of schools. An examination of these facts will show that in comparison with other towns Wells is not paying an excessive amount of money for its schools.

The appropriation recommended for schools in this estimated budget represents a sum of money from which both high and elementary teachers' salaries are paid, also fuel, janitors' wages, conveyance, and elementary tuition if any. One hundred dollars more is asked for in the supply account since the appropriation for several years has seemed to be insufficient for this expense. For repairs \$2,000.00 is called for in order to settle the

unpaid bill and carry out the needful repairs for the coming year. Div. 12 has not been painted since the improvements several years ago. The wood is badly checked and should be painted with two coats for proper protection. Some work should also be done on the interior of the school house. Several desks and seats must soon be furnished for Divisions 2 and 5 as many are wearing out. Repairs and improvements in the basement at Division 5 are imperative. Numerous and urgent repairs are also needed for Divisions 6, 7, 8, and 9. The wear and depreciation of school buildings is perhaps greater than that of any public buildings. We must continually refit them to keep them in condition.

### HIGH SCHOOL

Each year the high school shows an increase in its enrollment, it being necessary last fall to insert four new seats. More young people yearly are attending secondary schools throughout the entire state. The commercial course has been strengthened somewhat by an improved bookkeeping course and a program of intensive commercial work to be confined to the junior and senior years. An atmosphere of business efficiency pervades the entire institution. A detailed report of the high school submitted by the principal follows.

### GENERAL

Throughout the year there has been a general spirit of co-operation and enthusiasm for improvement in the several departments of school activities. In conclusion, I desire to extend a word of thanks to you for your helpful suggestions and support in carrying forward the affairs of the schools during the year.

Respectfully submitted,

WALTER E. LANE,

Superintendent of Schools.

## REPORT OF HIGH SCHOOL PRINCIPAL

Mr. Walter E. Lane, Superintendent of Schools:

I hereby submit my second annual report of the work of Wells High School.

At the opening of school in September, 1924, there were enrolled 84 pupils; of that number 33 were girls and 51 were boys. The teaching force remained the same as that of the previous year, thereby facilitating dispatch in getting underway, as all were familiar with their program of work, and the policy of the school.

## COURSE OF STUDY

Although the course of study in all important respects remains the same this year as it did last, still, in a few details, changes have been made, which I believe are well worth explaining in this report. Also, in order that parents of those pupils in school, and parents of those who contemplate High School, may have an opportunity to know just what we are offering, I am including a copy of the course of study in this report, as follows:

\* Alternating years.

The first two years of all courses you will note, call for approximately the same work, giving the same general foundation to all pupils up to the Junior year. This does away with first year pupils making a selection of studies which in many instances in the past has proven to be an unsatisfactory one; in that, at the end of two years they have found that they have been studying a line that they did not want. In the new program you will note that commercial specialization does not begin until the Junior year. By that time the student should know whether he wishes the Classical, General or Commercial branches.

### EXPLANATION OF POINTS AND CREDITS

The school year is divided into four ranking periods, each nine weeks in length. At the end of that time reports are mailed to all parents. At the close of the fourth week of each quarter warnings are mailed to the parents of those pupils whose work is in such a condition as to endanger their passing for the quarter.

Each student is required to take four studies a year. These four studies, if successfully completed, will give the pupil sufficient points to graduate at the end of four years. No student should take more than the allotted four, except under special circumstances. Such a program allows for three 40-minute study periods each day during school hours. On this basis the amount of home study should equal the amount of school study or on the average of 120 minutes a day.

A subject taken five times a week for one year, and successfully completed, entitles that pupil to five credits towards graduation. (Typewriting is an exception to this rule,  $2\frac{1}{2}$  points being allowed.) Seventy-five credits are required for graduation, 20 of which must be in English. A student must successfully complete 15 credits a year for class standing.

### MISCELLANEOUS

The publication known as the York County School News, I feel, has been an asset to the school, as well as to the county. Through it, opportunity has been offered for students to show their talent in composition and ability in business.

I feel that in passing, Athletics deserve to be mentioned. Certainly the physical side of school training cannot be overlooked. To say what we can offer in a physical way for the benefit of the High School student is of any great contribution, may rightly be questioned. However, the spirit and the interest shown by the boys in what little we are able to do in an athletic way is indeed gratifying to me, and I feel doubly repaid if better habits of physical hygiene and mental discipline are thereby encouraged,

and that only, is the true measure of success. The girls also are having a limited opportunity for this same improvement. I wish that more ample means might be offered, but our facilities are as favorable as those found in most High Schools of this size.

A system of rotating periods, whereby each subject occurs at a different time each day, adds interest to the daily program, and does away with the monotony that found its way into the old system.

The Student Council, which was successfully organized and put into operation last year, is again giving to the students an opportunity to take charge of their own affairs to a certain extent, thereby encouraging the expression of executive ability on the part of its members.

Again this year there is an organization of the Camp Fire Girls and a Student Choir. Plans are under way, and I hope that they may be completed, for a Student Orchestra.

### SCHOOL GROUNDS

A subject which I approach somewhat hesitatingly is one that calls for the improvement of the school grounds, thereby demanding the expenditure of money. I am not in a position to recommend a plan for raising the money for this purpose or to outline its cost. I wish only to call attention to the fact that there is a great need for improvement in this respect. The buildings are, from the standpoint of appearance, an asset to the Town, and with these buildings should be a graded yard, with walks and drives constructed. Students would gladly confine their activities to the spacious property at the rear, if something could be done in this direction. I find that practically all High Schools in York County have their High School property graded. I feel that the returns to the Town in civic improvement will be more than worth the investment. With a large amount of traffic passing our building at least eight months of the year, it seems that the Town, in no better way can show that it stands for community betterment. Again, to be in keeping with the residences nearby, and out of respect for their property the Town should make this school property a beneficial neighbor, rather than one that detracts from the value of the adjoining homes.

### SUMMARY

We have a good school, a group of young people well deserving of the money spent on them by the Town. We are creating more and more a spirit of accomplishment, a spirit that is seeking those things that are worthwhile. We are teaching to seek the truth, and to seek knowledge for the practical help that it is go-

ing to be later. We are not seeking a standard set by a variable marking system, but a standard set by the students themselves, which is nothing more or less than "what is worth doing is worth doing well," with a realization that "knowledge is power."

I wish to thank citizens, school board and superintendent for their cooperation and support.

Respectfully submitted,

H. PAUL LARRABEE.

## REPORT OF WELLS BEACH HOSE COMPANY

To the citizens of Wells:

In submitting my report for the year 1925, I would say that we have been very fortunate in regard to fires in the past year. We have answered to only eleven alarms, which is less than any year since the company was organized.

During the past year, the cost of equipment was very small, only a few repairs were necessary on the truck. I have tried to keep the expenses down as much as possible. I think that with what equipment we have (with the exception of a roof ladder) that we can get along for the ensuing year. The roof ladder that we have now is not long enough for many of the roofs.

In last year's report, our ex-chief, Mr. Studley, mentioned the fact that the Town and Water District were making a sad mistake in regard to the extension of water main and installation of two more hydrants on Atlantic Avenue. I think that the Town, as Mr. Studley stated, is making a sad mistake in letting this matter go, as there are over 100 houses without one bit of fire protection whatever.

The following is the report of fires that this company has answered to during the past year.

Jan. 24—Chimney fire at Harry Yorke's, damage none.

Feb. 28—Chimney fire at Burleigh Littlefield's, damage none.

March 13—Barn burnt at Bert Smith's, damage unknown.

March 24—Grass fire at White House Farm, damage none.

April 2—Woods fire at Bald Hill, damage unknown.

May 8—Barn fire at Isaiah Chadbourne's, damage \$250.

July 15—Woods fire at Ogunquit Beach, damage none.

August 2—Brush fire at Moody's, false alarm.

Aug. 28—Woods fire at Ogunquit Beach, damage none.

Sept. 6—Roof burnt at Ocean View Cottage, damage unknown.

Sept. 30—House fire at Ogunquit, damage none.

In closing I wish to thank the members of the department and the citizens of the town for their help in the past year.

Respectfully submitted,

GEORGE P. MOODY, Chief.

## REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the Superintending School Committee of the Town of Wells:

I herewith submit the annual report concerning the condition of the schools, for the school year of thirty-six weeks, ending January first, 1926.

## TEACHERS

A record of the names of all teachers, the schools in which they serve, and their wages will be found in the statistical report at the end of the school report.

Several new teachers began work with us at the opening of the fall term of school. Three of these teachers had a previous teaching record of a high order, and all were graduates of our normal schools where they made excellent progress in the teaching profession.

During the past year, there has been an apparent growth, a

general improvement in the character of the work done in the schools. I have only words of high praise for the teachers, all of whom have given their best in thought and in service to their schools. In time of need, they have proven resourceful and faithful to their trust.

In the past I have endeavored to obtain a helping teacher for our town. This teacher conducts her work in the usual manner, devoting one day occasionally to visiting schools where she may help a younger or less experienced teacher. In order to keep her school five days a week, she finds it necessary to teach Saturdays. This also gives her an opportunity to receive other teachers and demonstrate methods. Much real assistance is derived from this plan, without additional expense to the town. It may be possible for us to further improve our teaching force by the services of such a helping teacher.

### HEALTH CONDITIONS

Several cases of chicken pox and mumps occurred in the winter and spring terms of school. On the whole, health conditions have been good.

Our present medical inspection is carried on as well as can be expected for the time and money that is devoted to it. The physicians examine the children once during the year. Doctor's services should be supplemented by the services of a part time nurse, who would assist the physicians and follow all defective cases, submitting at the end of the year, a written report of the results obtained.

The value of hot noon lunches for school children is unquestionably desirable, especially during the winter months. We have found that hot lunches are stimulating and have a tendency to improve the child's health and greatly improve the character of his work in school. Good health in a well nourished child leads to higher averages. We have an efficient hot lunch counter at our high school, which is at the service of not only the high school students but also the pupils of the grades, accomodating over a hundred girls and boys daily. Several of the more rural schools are serving excellent hot noon lunches with good results.

### CONVEYANCES

Our school conveyances, especially at Wells Corner, are better prepared for school service than in former years. We have been able to maintain a reliable auto bus system nearly the entire school season. The heavy snow storms only have made necessary the use of horses and sleds. Centralization of schools by use of auto conveniences, especially over State roads, can be made a success.

We need to carefully consider centralization of schools at Wells Corner and provide a larger central school building.

High school students from Ogunquit and Moody usually ride to school on the Kennebunk-York Bus. However, the tendency prevalent is for each student to seek the most economical course, each finding his own conveyance. The money appropriated for high school transportation is insufficient to defray the total expense of transportation for each student living over two miles away. It has been the practice to apportion the money raised for this purpose on the basis of mileage largely, and as a rule this apportionment pays from one-third to one-half the total expense. I feel that a definite sum of money should be paid to a bus line to Ogunquit, making possible a reliable and dependable service for all students through one concern. Students coming from other sections should receive a proportionate sum.

## REPAIRS

Repairs contemplated one year ago, were made during the summer months. Several minor improvements and painting Division 12 were not completed since funds were not available. At Division 2, the chimney was retopped and both rooms were painted in light shades. Money was raised in the Grammar room and used to varnish seats and desks. It was necessary to rebuild the smoke flue of the high school building to guard against fire. The walls and ceiling at Division 3 were painted in light shade. The walls of Divisions 7, 9 and 12 were patched and painted in a cream shade, and the ceilings murescoed. The seats and desks were repaired and varnished at Division 12, the seats and desks were repaired at Division 9 but need to be varnished. New steps were made for this school. More work was done at Division 5 than was contemplated at first. The ceilings were whitened, and walls of both rooms and hallway painted a cream shade. Both toilets were much improved and a new pipe laid connecting with the sewer mains. It is anticipated that it will be impossible to prevent all dampness in the basement during heavy rain storms without more extensive repairs. Our repair expenses have not been greater than of the year preceding, yet we have on the whole very greatly improved the interior of seven of our schools, adding much to the pleasantness of the children, teacher and providing better sanitary facilities.

There are several urgent repairs to be made. Six new outside doors and casings are needed. Divisions 4, 6, 7 and 8 need urgent attention both on the interior and outside to preserve them and keep them in condition for service. Divisions 5, 9 and 12 should

be painted on the outside. A new fence should be erected about Divisions 3 and 5. Many of the seats and desks should be varnished as a sanitary and protective measure, and a few new blackboards purchased.

### SPECIAL REPAIRS

A situation that calls for careful consideration is the present housing facilities at Division 2. We have at present in the Primary room a registration of over fifty children, forty-eight of whom attend school regularly, representing the four lower grades.

The maximum number of children recommended by the Department of Education for one room should not exceed 35. It is estimated that after the present fourth grade is promoted and the incoming Primary pupils have been accounted for, that there will be a registration for this room of 56 children or more, provided none move away or new families move in. To open Division One does not solve this difficulty of providing sufficient room for all since it would draw from this room only eight pupils. It seems that space must be provided to open at least one room in addition, making three rooms, to satisfactorily carry on the school work for next fall. To enlarge our school buildings and open one more room provides for the present numbers only. I believe we should look ahead and make estimates for the next ten years to come, and if an expenditure must be made to care for this housing situation, build a school house large enough to amply accommodate all, even should consolidation be carried further. Therefore, I recommend that a four room school building be erected on the site of the school grounds at Division Two. A representative of the Department of Education has been called to make an investigation of conditions at Division Two. A written report has been forwarded to the school board condemning the situation on account of the congestion and inadequate toilet facilities. The report urges that a new building program go forward this summer.

### SUGGESTED SCHOOL BUDGET FOR 1926-27

Necessary Appropriation, Common Schools	\$10,800.00
Necessary Appropriation, High School	6,500.00
Necessary Appropriation, Books	800.00
Necessary Appropriation, Repairs	2,000.00
Necessary Appropriation, Supplies	800.00
Necessary Appropriation, Superintendence	800.00
Necessary Appropriation, High School Graduation	100.00
Necessary Appropriation, Insurance	225.00
Necessary Appropriation, Water Rent	200.00

Suggested Appropriation, High School Transportation 1,600.00

These items have all been carefully passed upon by the school board and represent their request for funds to operate all schools for the ensuing year.

Work in our high school has steadily advanced throughout the year with excellent support from the students and teachers. The various activities have been readily carried forward with splendid co-operation. I refer you again this year to the detailed report from our high school principal concerning the conditions of our school.

In general, the support and progress made has been excellent throughout the town. In conclusion, I desire to extend an expression of gratitude to all for individual help and suggestions in carrying forward the affairs of our schools during the year.

Respectfully submitted,

WALTER E. LANE,

Superintendent of Schools.

## REPORT OF HIGH SCHOOL PRINCIPAL

Mr. Walter E. Lane, Superintendent of Schools:

I hereby submit my third annual report of the work of Wells High School.

### GENERAL STATISTICS

One change was made in the faculty this year, Miss Gertrude Belyea took the position formerly held by Mrs. Colbath, who resigned in June 1925.

Our High school continues to be a Class "A" school. Pupils may be fitted in four years for entrance into any College or University, provided the pupil selects the proper courses and does satisfactory work.

Parents who are interested in learning the details of our course of study, I wish to refer to my report of last year, which contained an account of the courses offered.

The following is an outline of the present regulations regarding credit:

1. One subject taken five times a week for one year gives one unit credit. (Typewriting is an exception,  $\frac{1}{2}$  unit).
2. 16 units are required for graduation. (Beginning with class of 1927.)
3. Passing mark is 70. A general average of 70 is required for a year to pass in a given subject.
4. Certification mark for college is 85. (In each subject.)
5. Class standing is granted as follows:
  - 3 units—Sophomore
  - 7 units—Junior.
  - 11 units—Senior
6. All pupils must take at least four studies, five times a week, throughout the year. (Typewriting not accepted as one of the four).

We are carrying on a number of extra-curricula activities. Among the most prominent are athletics, Wells High News (published bi-weekly), school choir, Student council, and class dramas.

### ATHLETICS

Athletics are now an integral part of the training in the modern school. The benefits of supervised athletics are recognized by all leading educational authorities. In a school of this size we are able to do but little, but what we are able to do, I feel, is well worth while.

Athletics are run on a strictly systematic basis. We have regular hours of supervised practice, regulations for participation as outlined by the State Secondary School Principal's Association. Only the highest form of clean sportsmanship is taught, and nothing less than that is tolerated. The attitude of the citizens toward athletics has been especially gratifying, in that, inside of 48 hours, over \$125 was raised in support of football last fall. Again, over 400 citizens voiced their opinion in favor of basketball at a time when there was some opposition to it by some who did not understand the facts concerning our athletic program. The financial side of athletics is handled in a strictly business like manner, man-

agers turning in their reports at regular intervals for approval. Thus far, athletics have financed themselves, and we have paid all legitimate bills and met all agreements to the letter.

## RECOMMENDATIONS

1. As I have mentioned in previous reports there is a decided need of a music instructor in the public schools of Wells. A short time given to the High school each week would be of great benefit and aid to us in organizing our musical program in a worth while manner. There should be a place in our curriculum for training in musical appreciation, but we are unable to develop this without proper guidance. A school system without such musical supervision is rarely found today.

2. During the past year we have added a number of volumes to the school library, with the result, that the cases we have are entirely inadequate. At a comparatively small expense, sufficient shelf room could be provided. The need is urgent, if we are to protect the books we have, and make way for growth.

3. Physical examination of all pupils in the High School, should be given at least annually, and still better, once a term. It should be made as thorough and complete as time and money can provide. A physician or competent nurse should be employed for this purpose.

4. The room that we are obliged to use for language recitations, is so located, that it is impossible to heat it with the present heating system, during a major part of the winter months. The room, during this time, is entirely unfit for occupation, and is dangerously cold for teachers as well as pupils. The addition of two radiators would take care of the situation. The present boiler is large enough to handle two additional radiators.

The school grounds are in such a condition that the Town should take steps to grade and beautify them. It would be a policy in line with civic improvement. This matter I mentioned in my report of last year. I sincerely hope that steps will be taken to improve the school property. By so doing, we will be adding to the attractiveness of the Town, and will be presenting a better environment for our student body.

## CONCLUSION

I feel that our school is maintaining a higher standard than ever before, that we have a fine group of young people enrolled, and that we are accomplishing real worth-while projects every day. I wish that parents and friends might visit our school more often, so that they might have a first hand knowledge of all that we are doing

day by day. We seek to teach the truth, to encourage independent thinking, and to lay the foundations for worth-while, christian lives. I feel greatly indebted to the pupils, teachers and parents for their part in making our school a good school, and one that is rendering a real service.

I wish to thank the school board and superintendent for their kind support.

Respectfully submitted,

H. PAUL LARRABEE.

It appears that we overdrew on the Officers' Salaries, but this was due in 1924, but orders for same were not drawn until after the books were closed, and for that reason it appears in this year's account.

Under Article 9, not enough money was appropriated to take care of the fixed indebtedness, but it was paid and we have carried it as overdrawn. Under Article 10, this overdraft was due to several things that the Fire Company needed, such as wrenches and supplies for the Chemical, but the largest part of the overdraft was due to the traveling expenses of the Committee in the purchase of the Motorized Pumper.

Under Article 12, the Corporation appropriated \$1,000.00, and we received \$200.00 from the York Utilities Co. for the grading of Main Street after the rails had been removed, which gave us \$1,200.00, so the actual overdraft is only \$200.88, and this was caused by the fact that in order to save our Tarvia roads, we had to expend the following:

Repair Main Street in Square	\$414.16
Gutter, Weare's Hill	129.95
Gutter, Thompson's Hill	95.83
Ledge Road	75.64
Stearns Road	19.55
Grading for above	88.76
Total	<hr/> \$823.89

Under Miscellaneous, we have included a note for \$500.00 at York County Trust Co., for advertising purposes, which was voted at a special meeting.

### STATEMENT

You will notice that the amount that the Overseers handle each year differs with the amount the Treasurer has shown to have passed through her hands; this is due to the fact that the Corporation votes to pay each year certain fixed charges which are as follows:

Sewer and Road Bonds	\$4,000.00
Interest on above Bonds	1,200.00
Amount due for High School	700.00
Amount due for Hydrant Rental	996.13
Amount due for State Highway Maintenance	139.80
Total	<hr/> \$7,035.93

And this sum was retained by the Town out of the money coming from Wells to Ogunquit, so that the bill was paid as voted; but in this manner, so that the above sum did not actually pass through the Treasurer's hands; the above amount will change from year to year until the bonds are retired.

F. RAYMOND BREWSTER,  
C. HERBERT LITTLEFIELD,  
WENDELL PHILLIPS,

Overseers of the Ogunquit  
Village Corporation for 1925

I have examined the Overseers' accounts and found them correct.  
ROBY P. LITTLEFIELD,  
Auditor pro tem.

F. Hilton and branching from the road at the School House in Div. 6 to Grays Corner so called.

Fifty-second—To act on the petition of Charles E. Brown and others, to see what sum of money the Town will grant and vote to raise to purchase equipment for the breaking down of snow on its highways.

Fifty-third—To act on the petition of Will C. Varney and others, to see if the Town will vote to extend the time of lighting Wells Beach one month, making the time of service from May 30th to Sept. 30th.

Fifty-fourth—To act on petition of O. W. Perkins and others, to see what sum of money the Town will raise and appropriate to the payment of the indebtedness of the Town to the Ogunquit Village Corporation in satisfaction of the Court's decision in equity case Number 173 in the Supreme Judicial Court of Maine, the principal amount of which has been agreed upon by both the Town and the Corporation; and further to determine the manner and form of financing said settlement with said Corporation.

Fifty-fifth—To act on petition of M. M. Freeman and others, to see what action the town will take in regards to taking over the fire station, and on paying the five hundred dollar (\$500.00) note to the Ocean National Bank.

Fifty-sixth—To see if the Town will vote and raise a sum of money to buy fire hose to be used by the Wells Volunteer Fire Company.

Fifty-seventh—To act on the petition of M. M. Freeman and ten others, to see if the Town will vote to raise and appropriate the sum of five hundred dollars (\$500.00) to fill in, grade and seed in, the grounds around the grammar and high school buildings at Wells Village, and how the same shall be raised, and to have a committee of three appointed as overseers of the work.

Fifty-eighth—To see if the Town will vote to accept a new Town Way at Drakes Island, beginning at the Town Way near the cottage of Charles Brown and running in a northeasterly direction 570 feet to lot No. 6 on the Laudholm Beach Lots plan, as laid out by Roland C. Libby.

Fifty-ninth—To see if the Town will vote to elect its selectmen for one, two and three years, and if so, in what order they shall be elected.

Sixtieth—To transact any other business that may legally come before said meeting.

The Selectmen hereby give notice that they will be in session at their office in Wells for the purpose of correcting the list of voters, on March 6th from 10 A. M. to 3 P. M., and on the day of the meeting at 9 o'clock in the forenoon.

Hereof fail not to make due service of this warrant and a return of your doings thereon, at the time and place of this meeting.

Given under our hands this Twenty-third Day of February, Nineteen Hundred and Twenty-six.

## REPORT OF SUPERINTENDENT OF SCHOOLS

To the Superintending School Committee of the Town of Wells:

I herewith submit the annual report concerning the schools for the year ending January first, nineteen hundred and twenty-seven.

## SCHOOL YEAR

It has been customary in the town of Wells to terminate the school year December 31, of each year. This has seemed to be the logical end of the school year in many towns. However, it should be adjusted to coincide with the closing of the town records which occurs February 1st of each year. This would avoid any misunderstanding among the towns people in

regard to accounts as reported by the superintendent of schools and by the municipal officers.

### TEACHERS

Some of the best instruction is being daily presented in schools where teachers have remained for a period of years in the same position. It is indeed fortunate for the schools if there is a minimum of changes in the teaching force from year to year. During the past two years there has been very few changes in the teaching force of Wells. New teachers were employed for Divisions 1, 6, 7 and in the Language and Commercial Departments of the High School.

It is gratifying to note the spirit of enthusiasm and interest prevailing among our teachers.

### HELPING TEACHER

Mrs. Marion Tucker, teacher at Division 9, qualified to serve as a helping teacher for this town by taking up the special course at Castine under the direction of the Department of Education. Her assistance in methods, exemplification of class work and direction among the young teachers have proved valuable. Much remains to be done especially along lines of recreation and equipment of school grounds.

### HEALTH

Several cases of chicken pox, measles and whooping cough occurred during the winter and spring terms which lowered the school attendance in various parts of the town. Except for colds the health conditions were good during the fall term. A case of scarlet fever appeared recently in the high school, but any epidemic was checked by the prompt action of the board of health and doctors. In my report of a year ago, I suggested that the services of a nurse would be of great value in following up the work of the physicians, and greatly assisting us in the event of an epidemic. I again suggest and advise that a sum of money be raised for medical betterment of our school children. It is an undisputed fact that large numbers of minor physical defects, such as bad teeth, poor vision, poor hearing, defective and enlarged tonsils and adenoids have a tendency to lower a child's vitality, make him more susceptible to diseases, and put him in a class where he cannot get the most out of his schooling. These defects may seriously affect his adult life. Why expend money for the best text books and instruction and allow from 10% to 50% of each school to remain below normal health standards? Why not provide a small sum for the services of a part time

nurse? Remove the defects, put down the barriers, and let all children have an equal chance to get the most from the best that the town schools have to offer.

The York County nurse has found time to examine nearly all the school children once. But to make the work consistent, a nurse must do follow work and submit a report of her findings. Therefore, I urge that the small sum of \$400.00 be raised for medical inspection.

### VACCINATION

Late in the spring of 1926, all pupils of the Pine Hill School, together with the teacher were vaccinated. The project was entirely a success. It is hoped that others will be vaccinated this season, as danger of a smallpox epidemic is still possible, inasmuch as many people are visiting the South and West where there is an occasional outbreak of the disease. Vaccination is free to all children, and is offered under the direction of the local health officer once each year.

### PARENT-TEACHER ASSOCIATION

Special commendation is due the local Parent-Teacher Association in presenting a stimulating force upon matters pertaining to the welfare of our schools. The organization, though not very old, has acquired prestige because of its stand on school affairs. It was first instrumental in arousing interest in grading the yard about Division Two and the High School. It has been instrumental in developing interest in public speaking, only recently offering prizes for a public speaking contest to be held among the high school students. Discussion pertaining to better health projects in support of the work of the county nurse have been endorsed. Funds for necessary X-ray pictures were given when a clinic was held at the high school last summer.

### BOOKS

The constant depreciation in text books in use in school rooms makes it necessary to continually replace the worn books. This cost per capita is generally estimated to be slightly over two dollars a year. With a school census of about 400 pupils actually in attendance it is better understood that our appropriation for books does not allow for the introduction of many reference books. Reference books, to guide the teacher and assist students should be available. Such works prove a decided advantage in becoming familiar with late developments in all branches of industry, science and literature.

## SUPPLIES AND REPAIRS

All schools have received supplies in sufficient quantity to carry forward their programs.

Appropriations made for repairs have been expended in the following manner: The sum of \$1000 raised for Division 2 was used in rebuilding and in refitting plumbing fixtures to improve toilet facilities. In this part of the school building, two small windows and two ventilators were instituted in suitable positions, also more bowls were provided. A new floor was laid in the toilet rooms. The valley on the roof adjoining the school rooms was raised, and the school building entirely shingled. This building is insured for \$2000. Other expenditures for repairs were for substantial fences erected at Divisions 3, 5 and 8. The fences were built of heavy cedar posts, dipped in creolin solution and with extra heavy woven wire. A small piece of land, about one-fifth of an acre, was purchased by the school department for school grounds at Division 8. This purchase was a necessity. The following school houses were painted in lead and oil on the outside: Divisions 2, 4, 5, 6, 8, 9, and 12. Divisions 4, 6 and 8 were painted in light shades on the interior, seats and desks were also varnished. In addition to these extensive repairs it became necessary late in the season to shingle Division 4. No. 1 cedar shingles were used. This last expenditure caused a slight overdraft.

Cleaning schoolhouses and minor repairs are included.

## SPECIAL

Although extensive improvements have been made for the physical betterment of many schools in town, other conditions remain to be corrected. Division 3, a school of about 30 pupils, must be remodeled, and from a sanitary standpoint be made to comply with the demands of the laws going into effect in September, 1927. The remodelling would include enlarging the wood shed, and providing two toilets, one for boys and one for girls, separated by partition, and accessible only from the main school room. A special sum of money should be raised to improve this school.

I wish to call your attention to the general lack of suitable receptacles for books and supplies. Book cases and cupboards are needed in almost every school house. Blackboards should be purchased and installed in many of the schools, as those in use are not satisfactory.

New gutters on buildings to conduct rain water away from the sloping ground leading to the basements and cellars of Di-

vision 2, High School, and Division 5 should be provided as soon as possible. Division 7 should have several improvements this year.

### SNOW PLOW

The valuable service rendered by the acquisition of a snow plow is inestimable from the standpoint of the school department. There never has been a winter when school children and teachers could so comfortably and regularly attend all schools, following heavy storms. School conveyances have been greatly aided and may now at the desire of the people be still further employed in various parts of the town in grouping our little schools together.

In conclusion, I wish to state that I am grateful for the splendid spirit of cooperation and interest manifested in the past year, and extend my thanks for this assistance.

Respectfully submitted,

WALTER E. LANE,

Superintendent of Schools.

## REPORT OF MUSIC TEACHER

Mr. W. E. Lane, Superintendent of Schools:

Since it is so brief a time since the opening of the school year, I am unable to give a very comprehensive report at this time. I can only tell you about the things we have started and the things we are looking forward to doing in the near future.

Music is a mental and spiritual tonic for the children and the aim of public school music is to develop a love for and appreciation of music on the part of the child. Voice culture and interpretation are taught by imitation and suggestion. Music reading is not a memory but a reasoning process, taught by pedagogical presentation of principles of time and tune.

After a love of music has been instilled and how to sing correctly has been taught, then the three vital essentials needed to accomplish the aims in music are:

1. Ability to find "do," or key note.
2. Rhythms.
3. Chromatics.

Owing to the lack of music in the schools until this year, it was necessary for me to start the children singing rote songs to appreciate the value of true tone. It is important for them to know how to hear as well as how to sing correctly.

Beginning the second term, the classes quicker to grasp instruction are now on the road to reading notes in the book. I found it necessary to eliminate and teach only the needy things that will serve them well in later years. Sooner or later, we shall not only recognize the cultural values of music, but we shall understand that after the beginnings of reading, writing and arithmetic, music has a more practical value than any other subject taught in the schools. How many people wish they could carry an easy tune in assembly singing? Truly music has a wonderful influence upon the child. It not only brings out the better qualities of his child life, but has a fine molding influence in character building.

Briefly, we have developed unison singing, introduced a variety of rote songs, improved the quality of tone and therefore improved interpretation and expression. All of which helps in the development of a better ear for time, tune, and given rhythm.

I have enjoyed my work in the schools this short period. I have found the school department, teachers, students, and the public very cooperative, and for this cooperation and interest I wish to extend thanks.

Respectfully submitted,

EVA MILLER,

Supervisor of Music.

## REPORT OF HIGH SCHOOL PRINCIPAL

Mr. Walter E. Lane, Superintendent of Schools:

I hereby submit my fourth annual report of the work of Wells High School.

### STATISTICS

At the opening of school in September, 1926, the registration was as follows:

Post Graduates	1	
Seniors	16	
Juniors	15	
Sophomores	14	
Freshmen	31	
Total		77
Total number of girls		38
Total number of boys		39

### GRADUATION 1926

The graduation of the Class of 1926 was, in some respects, a

very significant event. A class of sixteen graduated, before a gathering of some 700 people, which is without doubt, the largest that ever witnessed these annual exercises in Wells. The class was the largest, with one exception, that ever graduated from this school. It is interesting to note that their scholarship and general ability rating was unusually high.

### COURSE OF STUDY

The Course of Study of any High School must, of necessity, change from time to time, in order to keep pace with the general progress that is being made in the field of education. For the benefit of the parents of pupils, and the parents of prospective pupils, I am including in this report a copy of the Course of Study again this year as follows:

### EXPLANATION OF POINTS AND CREDITS

The school year is divided into four ranking periods, each nine weeks in length. At the end of that time reports are sent to all parents. At the close of the fourth week of each quarter warnings are mailed to the parents of those pupils whose work is in such a condition as to endanger their passing for the quarter.

Each pupil is required to take four studies a year. These four studies, if successfully completed, will give the pupil sufficient points to graduate at the end of four years. No pupil should take more than the allotted four, except under special circumstances. Such a program allows for three 40-minute study periods each day during school hours. On this basis the amount of home study should equal the amount of school study or on the average of two hours a day.

The credit regulations are as follows:

1. One subject taken five times a week for one year gives one unit credit.
2. 16 units are required for graduation.
3. Passing mark is 70. A general average of 70 is required for a year to pass in a given subject.
4. Certification mark for college is 85 (in each subject).
5. Class standing is granted as follows: Pupils must have at least—
  - 3 units—Sophomore
  - 7 units—Junior
  - 11 units—Senior

The marking system is as follows:

- A—Excellent (95-100)
- B—Good (85-94)
- C—Fair (75-84)
- D—Poor (70-74)
- F—Failure (below 70)

### WELLS HIGH NEWS

The school department, together with the student body, have purchased a mimeograph machine, which has proven a very worthwhile investment, even during the comparatively short period we have owned it. We have been able to publish regularly, a journal of the high school activities that has given a way by which parents at home might learn of what we have been doing at school, and a way by which we might record the worthwhile things that have been taking place day by day in the school life. Outside of the above values it has given a number of pupils practical work in journalism.

## CLUBS

We have organized this year, departmental clubs that have served to arouse interest in the various subjects as well as serving as an incentive to scholarship. The following clubs have been organized: History Club, Language Club, Commercial Club, and Science Club. The membership is honorary and is limited to upper classmen that have attained satisfactory marks. The clubs are devoted to extra-curricula investigation and research in their particular branch.

## ATHLETICS

In a limited way we have endeavored to give pupils the advantages of athletics, as far as a school of our size can do. In consideration of our restricted resources for such activities, I believe we have accomplished much in this line. The value of supervised athletics is recognized universally. Through the kindness and forethought of our citizens we have had the Town Hall free of charge for this purpose. At the conclusion of each season we have employed workmen to paint and make minor repairs, that the hall may be kept in good condition. The townspeople have derived a great deal of entertainment and pleasure from the athletic contests conducted by the High school, as evidenced by the large crowds that such contests always command.

## STUDENT COUNCIL

A council of pupils, elected by the student body continues to have general supervision over extra-curricula activities, and after four years trial, continues to improve in its service to the school.

## COLLEGE ENTRANCE

Wells High School is a so-called "Class A" high school and is so listed by the State Department. It is qualified to prepare pupils in four years for entrance into any college or university in the country. At the present time we have an excellent representation of Wells High graduates doing good work in colleges and normal schools.

## SNOW PLOW

The snow plow that has been maintained by the Town during the winter just passed has been of material aid to us, in that we have been able to hold sessions of school without interruption by storms, as the roads have been in an exceedingly good condition all winter. In previous years considerable time was lost due to bad travelling conditions.

## MUSIC

The introduction of music, beginning in September 1926, has been a feature that deserves mention. There has been a long felt need of such instruction by a special teacher hired for that purpose. The course that has been so recently established I hope will continue to grow and render a greater service in the years ahead. We have established something quite in keeping with modern progress.

The school choir aids materially in the daily singing.

## SCHOOL GROUNDS

A forward step in keeping with civic improvement was made last spring when the Town voted to grade and generally improve the school grounds. The appearance of that part of the Town has been thereby greatly enhanced and without doubt the actual value of the property has been increased.

## LUNCH ROOM

We have continued this year, the serving of hot lunches to pupils, only on a much more elaborate plan than formerly. In the first place, we transferred the lunch room from a comparatively small room on the first floor to a much larger room in the basement. Besides establishing more commodious quarters, we have served a pleasing and nutritious variety of food. The lunch room has been a decided success from every standpoint.

## LIBRARY

At the beginning of the present year when the lunch room was moved from the first floor to the basement, the room formerly used for lunches was made into a library. This has given us an opportunity to develop that particular phase of school life to some advantage. Reference work has been carried on to a far greater extent than ever before. Although the number of volumes is limited still we have made a good beginning toward a useful library, and it should continue to grow year by year. A librarian is on duty at all hours, who is in direct contact of books.

## PUBLIC SPEAKING

Outside the usual work in drama which we do each year, we are inaugurating a Prize Speaking Contest. Prizes will be offered by the Parent Teacher's Association. This contest will be held in the early Spring. This should become a very worth while annual affair.

## MEDICAL INSPECTION

One of the greatest needs of our system at the present time is

a satisfactory system of medical inspection of all pupils. I refer anyone interested to the Laws of Maine relating to public schools, page 22, sections 40 to 47 inclusive. The science of medicine holds out much for us in these days of scientific enlightenment, and it is our duty by those in our charge to provide all the medical attention that we can bring to bear on them, in order that they may grow up with as strong a physical body as possible. Many improper physical conditions attended to at an early age will sometimes save a great deal of suffering later in life. One life made happier is worth the price.

### CONCLUSION

The Town of Wells has much in its history of which it can justly be proud. Among the institutions that have been developed within its boundaries, the High School has had a most interesting and helpful career. My only desire is that it may continue to grow in service and improve in the future as it has in the past.

I wish to thank all citizens for their friendly attitude toward the development of a good High School. It stands now, a monument to their cooperation and to their desire that each succeeding generation shall have the best of advantages.

I wish to thank the School Board and Superintendent for their cooperation and support.

Respectfully submitted,

H. PAUL LARRABEE.

## STATEMENT

You will notice that the amount that the Overseers handle each year differs with the amount the Treasurer handles from the Town each year; this is due to the fact that the Corporation votes to pay each year certain fixed charges which are as follows:

Sewer and Road Bonds	\$4,000.00
Interest on above Bonds	1,000.00
Amount due for High School	700.00
Amount due for Hydrant Rental	996.36
Amount due for State Highway Maintenance	139.80
<b>Total</b>	<b>\$7,036.16</b>

And this sum was retained by the Town out of the money coming from Wells to Ogunquit, so that the bill was paid as voted; but in this manner, so that the above sum did not actually pass thru the Treasurer's hands; the above amount will change each year until the bonds are retired or the installation of more hydrants.

F. RAYMOND BREWSTER,  
C. HERBERT LITTLEFIELD,  
Overseers of the Ogunquit Village  
Corporation for 1926.

Ogunquit, Maine, Feb. 15, 1927

I have examined the above accounts of the Ogunquit Village Corporation Overseers and find them correct.

ROBY P. LITTLEFIELD,

Auditor pro tem.

## REPORT OF WELLS BEACH HOSE COMPANY

In submitting my report for the year 1927, I am greatly pleased to state we have been very fortunate in regards to fires. The largest fire of the year that we responded to was that of George H. Littlefield's. I think that the citizens of the Town of Wells realize that the loss would have been much greater had it not been for the Ogunquit pumper. Now, I would appreciate it very much if the citizens would give their help in securing a pumper for us at our town meeting.

We have on hand at this time 750 ft. of hose on the truck which is in very good condition. We had a lot of old hose that gave out on us at the Littlefield fire and I would like to say that with 500 ft. more we would have a sufficient amount.

I would like to express my appreciation to the officers and members of the department for their promptness in which they have rendered their services.

Thanking the citizens of the Town of Wells for their support that they have given this Company in the past and the members of this department would appreciate your help at our 1928 Town Meeting.

Respectfully yours,

GEORGE P. MOODY,

"Chief."

## REPORT OF SUPERINTENDENT OF SCHOOLS

To the Superintending School Committee of the Town of Wells:

I herewith submit the annual report concerning the schools for the year ending January 31, 1928.

### SCHOOL YEAR

In the school report of one year ago, you will note that our school year terminated December thirty-first. Because of various misunderstandings and confusion arising, the school board this year voted to terminate the school year January thirty-first, which is the date usually selected for closing the municipal affairs of the town. Balancing the school account one month later than usual makes a school year of forty weeks on record. It has been possible to make this change because of the unexpended balance of 1926 and 1927, also since less money has been expended up to December 31, also since the town received a larger state school fund this year.

## TEACHERS

At the opening of the fall term, it was necessary to employ several new teachers, as will be noted in the statistical report occurring at the end of this report. All new teachers are graduates of normal schools or colleges with one exception, that being a teacher of excellent ability and having several years' experience in teaching. Generally, throughout the entire town, the present teaching force is presenting the school work and maintaining the schools in a satisfactory manner.

Mrs. Marion Tucker, the community helping teacher, has given much attention to the schools in her neighborhood in regard to methods of presentation, school projects, and to the stimulation of school recreational work. It is a school law that daily attention be given by teachers to individual hygienic needs of pupils. With this end in view it is very essential that games be enjoyed in the open air at recess periods. Also it is important that some equipment of recreational nature, such as swings, teeters, flying rings, giant stride, etc., be instituted at every school.

## HEALTH

It is a regrettable loss and a discouragement to pupils and teacher to have absences due to contagious diseases. It seems that there is a yearly toll on the health standards by the subtle approach of such diseases as mumps, scarlet fever, measles, whooping cough and other illnesses. In the past year we have had interruptions in various parts of the town causing inroads to be made upon our school attendance records. However, in the main they have been of short duration, and perhaps here credit may be given to the prompt action of our nurses. Many defects have been found by the nurse and a number of them have been corrected. The work of the nurse is inestimable in value to the pupils and a great protection to the parents and the town. I feel that this expenditure for this service is well made and I urge that the appropriation for the services of a nurse be made a regular part of the health program. May I call your attention to the report of our public health nurse, Miss Edna Avery.

## VACCINATION

Many parents had their children vaccinated in the fall term and took advantage of the regular free clinic offered yearly by the town. We have been lax in this matter. Surely we should not ignore the great epidemics of the past due to smallpox, nor can we overlook the fact that America is second as a nation in the number of cases of smallpox in recent years. The next free

clinic should be given in June, and all parents should allow their children to be vaccinated as a safety measure against this plague.

### TEXT BOOKS

With a constantly increasing school census it has been found necessary to provide more text books in the schools. For over two years the book appropriation has proved insufficient. This expenditure is nearly a fixed, or constant amount, and is vitally necessary to provide the tools with which pupils and teachers work.

### REPAIRS

The disbursements of funds for repairs have been carried out upon your recommendation. The special repairs were made at Division 3 to comply with the state sanitary laws. In addition minor improvements and repairs were made at this school house. Two outside doors were hung and painted, the interior walls were painted a light buff color, new blackboards were placed at convenient intervals on the wall. All school houses are now properly remodelled in accordance with state laws as far as toilets are concerned. Many buildings are still poorly lighted and improperly ventilated and heated.

At Ogunquit water pipes were affixed to the gutters on the west side of the building with the intention of eliminating surplus water coming from the roof in a rain storm, thus avoiding as much as possible the entrance of water to the basements. This measure has been a great help in this direction. New blackboards were installed in each room at Division 5, also new seats and desks of a most improved and convenient type were purchased for the primary room. New desks and seats are needed for the grammar grades.

The following school buildings were painted on the exterior with first quality white lead and oil paint—High school, Divisions 1, 16, and 7. On the interior of Divisions 1, 16 and 7 the walls and ceiling were done over in light cream shades which improves the lighting in the rooms very much. Two doors were hung at Division 7. An exit from the basement on the south side of Division 2 was made, as the old entrance on the north was always useless in winter. Several unexpected repairs were necessary, one of which was in improving and checking over the heating unit at the high school. New valves were put on and all corrections made where needed. The system has been generally improved so that it is more dependable, and the building can be warmed with less expense daily.

This year I recommend that funds be appropriated to shingle Division 7 as water easily comes through the roof; also that Divisions 3 and 14 be painted on the outside. Also that more funds be appropriated for seats and desks, since those in several schools are in very poor condition and of an obsolete type. The seats and desks in the high school especially are old and very unsatisfactory.

In conclusion, I wish to express my appreciation for your continued cooperation and support.

Respectfully submitted,

WALTER E. LANE,

Superintendent of Schools.

## REPORT ON NURSING SERVICE

January 1, 1927, to January 1, 1928

During the year of 1927, every school in Wells and Ogunquit was visited and every school child present at the time of the nurse's visit was given their annual inspection.

Three hundred fifty-four children were inspected for eyes, ears, nose and throat, and weight; 266 children were found defective; 134 needed the attention of a dentist, 102 had symptoms of a defective throat, 74 were from 10 to 20 per cent underweight, 6 were more than 20 per cent underweight, 13 were 20 per cent or more overweight, 81 with defective eyesight, 2 with bad hearing, 2 anæmic, and 1 tongue-tied.

It is impossible to give the exact number of corrections made as the result of the nurse's visit, but there have been a great many. Notices were sent home to the parents, by the child, of the weight, height, and normal weight, percentage of under or overweight, and any symptoms that the nurse might find of a defect.

There have been 13 tonsilectomies that the nurse has been the direct means of having accomplished. These children were accompanied to and from the different hospitals in different towns. Two crippled children were accompanied to the orthopedic clinic in Portland, and both are now under the care of a specialist. One had a special defect corrected.

There were two Child Health Conferences, one in Wells High

School building and the other in the church at Ogunquit. Both were well attended and Dr. Underhill was the attending physician at Ogunquit, and Dr. Macdonald of Kennebunk at Wells. The county nurses, Miss I. C. Johansen, R. N., and Miss Edna Avery, R. N., assisted these physicians at the clinics. There were 14 pre-school children and infants present at Wells and 9 at Ogunquit.

Dr. George Coombs, Director of Social Hygiene and Communicable Diseases, talked to the boys and girls of Wells High School, and then gave segregated talks to both.

The nurses have attended Parent-Teachers' Association meetings at different times and have given short talks. One nurse talked at the town meeting last year.

Dr. Smith, with the assistance of the county nurses, vaccinated 78 school children. This required at least two school visits to each school for arrangements and two or more afterwards for dressing the arms.

An analysis of physical inspection of school children shows that most defects are listed under the heading of malnutrition, defective vision, impaired hearing, abnormal throat conditions, nasal obstruction, and defective teeth. These defects, if not corrected, seriously hamper the child's progress in school and may produce a harmful lasting effect on health later in life.

If we correct these defects in childhood, we are safe-guarding the health of future citizens and the prosperity and well-being of our nation. The child in good health is a better pupil. The man or woman in good health is a better citizen.

1. Vision—Child should be able to read line marked 20 at a distance of 20 feet, or have glasses which are properly fitted.

2. Hearing—Child should hear a whisper at a distance of 20 feet.

3. Teeth—Teeth reasonably clean and no exposed roots or unfilled cavities or evidence of any disease present which can be corrected.

4. Throat—Child has no symptoms of trouble with throat or nasal obstruction and is not a mouth breather.

5. Weight—Child is not 10 per cent or more underweight or not 20 per cent or more overweight.

6. Posture—Child has excellent posture in sitting, walking, and standing.

To encourage pupils to strive to become "Six-Point" children, the Maine Public Health Association will furnish "Six-Point" buttons which will be awarded during the month of May, Child

Health month, to all who were "Six-Point" children throughout the year, also to those who have had their defects corrected, placing themselves in that group.

We ask your co-operation in helping your town to have as many "Six-Point" children as possible. A healthy child is the town's greatest asset.

Respectfully submitted,

EDNA AVERY, R. N., Staff Nurse,

Maine Public Health Ass'n.

Mr. Walter E. Lane, Superintendent of Schools:

## \* Alternating Years.

Each pupil is required to take at least four studies a year and it is strongly advised that this number be the maximum: it is far more beneficial to do good work in four courses than mediocre, or poor, work in five.

Class standing is granted thus:

3 units.....Sophomore  
 7 units.....Junior  
 11 units.....Senior

(A "unit" of credit is given for passing work in one subject taken five times a week for 36 weeks: 16 units are required for graduation.)

For ranking purposes the school year is divided into four periods of nine weeks each. At the close of each period a report is sent to all parents.

The marking system:

A.....95-100%  
 B.....85- 94  
 C.....75- 84  
 D.....70- 74  
 F.....Below 70 and failure.

The middle of each period parents of pupils failing a course or courses are so warned.

The certification mark for college entrance is 85 in each subject (or 15 points higher than the passing mark of the high school).

ATHLETIC ACTIVITIES have been continued. Our basketball team has proven its worth by intensifying school spirit and devel-

oping closer relations with other schools. We plan to have a baseball team in the field as soon as the season opens.

We have a DEBATING TEAM this year and have already joined the Bates League. The debating team, besides paralleling the athletic teams by representing the school in a scholastic way, will be of great value to its members by affording them the opportunity to develop poise and sureness of expression.

CLASS PLAYS have been successfully presented, one by the Junior and one by the Senior class. This form of activity supplements regular school work in training pupils besides supplying funds for whatever extra supplies classes may need.

Our LIBRARY has been greatly improved by the recent installation of a fine new book-case. This, with a number of new class supplement books we plan to secure in the near future, will do much toward bringing our reading room up to date.

PROGRESS, from the opening of the term in September to the present time, has been satisfactory. The school is listed as "Class A" by the State Department and it is the purpose of the faculty to maintain this rating and constantly to be on the alert to raise the standard both of scholarship and general preparedness. The latest tendency of the higher educational institutions of the country is to make entrance conditions more difficult to meet: our graduates must be well equipped else suffer in future attempts to increase their training.

PARENTS can cooperate with the school to an almost unlimited extent by furnishing their homes with the right kind of books and by insisting that their children devote a reasonable amount of time daily during the school year to intensive study. This habit, once formed, will reflect itself in the school just as other habits formed at home are so reflected. A pupil realizes from his school training in direct proportion to the work and interest he puts into it.

The TOWNSPEOPLE I have found generous and willing to aid the school in every way. Their hearty support means much to all of us. My thanks are gratefully extended to the Parent-Teachers' Association for financial aid to the debating team; to the selectmen for allowing the basketball team and the school in general the free use of the town hall; and to all individuals whose aid has helped to make our work successful.

To the Superintendent and School Committee my deep appreciation of their unstinted support.

Respectfully submitted,

FORREST C. BEAL.

Due from other sources	60.00
Total	<hr/> \$1,015.19

NOTE—Arrangements have been made whereby the Merrill Hotel Co. are taking care of a certain portion of their account each year.

## STATEMENT

You will notice that the amount that the Overseers handle each year differs with the amount the Treasurer handles from the Town each year; this is due to the fact that the Corporation votes to pay each year certain fixed charges which are as follows:

Hydrant Rental	\$687.00
Sewer and Road Bonds	4,000.00
Interest on above Bonds	800.00
Amount due for High School	700.00
Amount due for State Highway Maintenance	139.80
And such other sums as may occur which for this year are as follows:	
Tibbetts Bridge	80.00
Sherburne Bridge	140.00
Total	<hr/> \$6,546.80

And this sum was retained by the Town out of the money coming from Wells to Ogunquit, so that the bill was paid as voted; but in this manner so that the above sum did not actually pass

through the Treasurer's hands; this amount will change from year to year.

# Building Inspector's Report

February 23, 1928.

To the Overseers Ogunquit Village Corporation:  
Gentlemen:

As your building inspector, I submit the following report.  
1927

- Apr. 27 Dan Sing Fan Tea House—Coolidge, owner. E. D. Perkins, builder. Chimney 4 inches above roof, 8 inch wall.
- May 4 Mrs. F. Brooks' house. Condemned both chimney and fireplace. Since then they have been rebuilt with flu-lining.
- May 12 David Littlefield's Camps. Four new closets built. All sewerage entering cesspools. Agrees to build septic tanks in 1929, to replace cesspool.
- May 19 Inspected ladders on Colonial Inn Hotel, Geo. West, owner. Found four ways of escape from third floor.
- May 19 Inspected Sachem Hotel. W. B. Littlefield, owner. No fire escapes there. Agreed to put them up. This has not been done.

1928

- Jan. 18 Inspected Perley Jellison's bungalow in Israel's Field. Condemned chimney recently built, because of no flu-lining.
- On Jan. 11th, of 1927, I notified the following hotel owners regarding fire escapes:

Geo. R. West, L. E. Hall, Harry G. Nichols, W. H. Perkins, J. P. Littlefield, M. G. Littlefield, Knight & Merrill, N. P. M. Jacobs, H. L. Merrill Hotel Co., Mrs. N. E. Chapman, Mrs. Geor A. Adams, W. B. Littlefield, Mrs. Weare & Howlett, Henry Weare, Mrs. D. W. Perkins, A. L. Staples, J. B. Clark.

You are welcome to my services. Will not serve in 1928-9.

Respectfully submitted,

MOSES S. PERKINS.

## WELLS CORNER FIRE COMPANY

Wells, Maine, Feb. 21, 1929.

To the Officers and Citizens of the Town of Wells:

In submitting my report for the year ending December 31st, 1928, I will state we have been very fortunate in regards to the number of alarms we have answered as they have been of a minor state with the exception of a few and the total being fourteen (14) for 1928.

We would appreciate the support of the voters if they would extend their vote towards the truck which we are asking for in the annual meeting. I wish to thank the officers and members of the department for their services which they have given.

Thanking the officers and citizens of the town for their support which they have given in the past and hope they will not forget in the future.

Yours respectfully,

HARVEY J. SIPPEL,

Chief.

## REPORT OF WELLS BEACH HOSE COMPANY

In submitting my report for the year 1928, I am greatly pleased to state that we have been very fortunate for the past year in regard to fires.

For the year 1928 we have answered eighteen calls, eight with the small truck and ten with the new pumper.

I am pleased to state that the loss at fifteen of these fires were slight. The other three were calls to Ogunquit and considerable loss was involved in each call. The loss would have been much greater had it not been for the pumpers.

I recommend one hydrant to be located near the residence of Leon F. Goodwin. It is certainly needed and I hope that the voters will vote yes on this question.

We have done considerable work on our Fire House during the last year. We raised the building and put a cement floor in. We built ten feet on the rear of the building so as to give us ample room for the equipment. A new set of double doors were also put on and the building has been painted two coats.

Although we were not financially rich, the members have been cooperating with each other and we have obtained good results. At this time I want to extend an invitation to all of the voters of the town to come and inspect our building and fire apparatus.

To the citizens of the Town of Wells I extend in behalf of the Wells Beach Hose Co. sincere thanks for the support you have given this company.

Respectfully yours,

GEORGE P. MOODY,

Chief.

## REPORT OF SUPERINTENDENT OF SCHOOLS

To the Superintending School Committee of the Town of Wells:  
I herewith submit the annual report concerning the schools of Wells for the year ending January 31, 1929.

## TEACHERS

The following changes have taken place in our staff of teachers since the last annual report was issued.

Mr. Frank N. Eaton, Jr., A. B. from the University of Maine, A. M. of Harvard, with ten years' teaching experience, became principal of the high school replacing Forrest C. Beal. At Division three Miss Edna Merrill, graduate of Nasson Institute, a teacher of three years' experience, replaced Mrs. Marion Water-

house Goodwin, who resigned. Miss Louise Waterman, graduate of Gorham Normal School was employed to teach the Primary grade at Ogunquit. Mr. Grover Cheney was transferred from Division 14 to Division 8. Mrs. Nellie Bedell was transferred from Division 8 to Division 9 to replace Mrs. Marion Tucker who resigned. Miss Edna King of Saco, a Gorham Normal graduate, was employed to teach at Division Twelve. Miss Rachel Baker of Portland, a graduate of Gorham Normal, was elected to teach at Division Fourteen. Miss Geneva Perry of Division Sixteen also resigned during the summer and Miss Harriette Emery of Kennebunkport was elected to take her place. Miss Emery is a graduate of Gorham Normal School. Miss Eileen Watson of Kennebunk was employed to teach music replacing Miss Eva Miller.

Fortunately, we have been able to retain most of our teachers. Many of them have served several years with credit and are worthy and deserving of commendation.

## BOOKS

Last year I called attention to the need of a larger appropriation for text books. It is quite necessary to raise at least \$2.25 per pupil to maintain a dependable supply of text books. There is a constant wear and depreciation, so that this appropriation should be quite a constant sum. For several years the amount raised has been insufficient. Last Fall 414 pupils were enrolled. Multiply 414 by \$2.25 and add to that sum \$1.50 for each pupil of high school age (for library support) also bills of \$200.00 and the sum should be over \$1,200.00. It is necessary that teachers and pupils be given the tools with which to work.

## REPAIRS

Various repairs were made as planned. Divisions 3 and 14 were painted on the outside. New blackboards were added at Division 14. The roof at Division 7 was patched and fence erected about the school grounds. New seats and desks were purchased for the grammar room at Ogunquit also new movable seats and necessary equipment were purchased for the Primary Grade. I urge that you continue to raise a sum of money to replace the old and broken furniture now obsolete in many of the schools of the town.

## HOUSING

After the school census was taken in April, it was found that the enrollment in the lower grades, for the opening of the fall term, at Divisions 2 and 5 would be too great for the size of the rooms. It would not only be difficult to seat the large numbers but impossible to teach them with any degree of success, or idea or promotion, even should the Department of Education tolerate such a congested condition. Accordingly, the school board zoned the area about Division 2, requiring that the children on the outside of the zone go back to the outlying schools. This resulted in considerable friction and not without cause. In Ogunquit it became necessary to rent space outside the school grounds. After a prolonged search for a suitable place, Mrs. Herbert Littlefield agreed to rent a part of her home for a primary school. Here the school has progressed very well, but the attendance has not been all that was expected from the results of the school census. It is imperative that the Ogunquit School Building be enlarged to provide for all children as speedily as possible. The estimate now shows that between 95 and 100 children will be in attendance at the opening of the Fall Term.

Several of the schools of Wells are small in numbers, accordingly the per pupil cost is rather high, increasing as the numbers decrease. I wish to call your attention to the fact that two schools, namely Divisions 7 and 8, have an average enrollment below eight, and as such are considered of too great an expense to be operated with any degree of economy. The present enrollment at Division 8 includes two or three out of town pupils. The law provides that when the average attendance falls below eight the school is automatically closed and the matter of its continuation must come before the annual town meeting. Pupils attending these schools may be conveyed to nearby schools without undue hardship, but with certain benefits to them and economy to the town.

## JUNIOR HIGH SCHOOL

The Junior High School Plan is distinctly American. It has been adopted quite extensively in this country and abroad as the best plan of bridging the gap between grammar school and high school and the more thoroughly preparing for Senior High School activities. A new Junior-Senior High School building would be of great advantage to the grade school pupils of Wells. All pupils of the seventh and eighth grades would be allowed to attend the Jun-

ior High School, and thus come under the immediate direction of the high school teachers. The plan would cut down the number of grades in the one room schools, allowing the teachers more time for the development of the children in the first six grades. If the present high school building could be given to the elementary grades, and a new school building constructed at Division 2, or some suitable site, there would be space within the old high school building for nearly all elementary grade pupils should people in the various communities wish to unite in one large elementary, central school. To unite all the schools along the Portland-Boston highway means not only improving the opportunities for the children by the introduction of an enriched curriculum, but also means economy for the town of many dollars annually. In short to erect a new school building and unite as many schools as may seem convenient will not only prove to be for the best interests of the children, but will completely pay for itself in the saving of teacher expense, fuel, and overhead within comparatively few years. With many small scattered schools, any school system proves more expensive. May thoughtful consideration of centralizing schools along this dangerous highway be seriously and earnestly considered.

Our State Inspector of Secondary Schools writes as follows:

"The movement toward a continuous six-year organization for the high school is rapidly gaining acceptance. The plan has many advantages. For many high schools of our state the six-year organization offers a wider use of the high school machinery, more effective employment of the teaching force through departmental instruction, greater possibilities in socialization and perhaps most significant of all, a continuous program of studies together with greater opportunity for educational guidance. . . .

"The six-year high school plan seems particularly well adapted to the medium sized school system. Many towns that now maintain four-year high schools with fewer than 150 pupils may place the two upper elementary grade in the high school organization with excellent results. Some of the advantages of the plan may be summarized as follows:

"1. The upper elementary grade pupils are placed where they may have their educational needs most effectively served.

"2. The one teacher elementary school is relieved of two grades, which results in a better working unit.

"3. A larger teaching staff is justified. This in turn makes departmental instruction more practical for all grades.

"4. A wider range of courses is possible, especially those

having practical or vocational content.

"5. The special activities of the school such as music, athletics, literary, and other clubs, and general "social" training become more interesting because of larger numbers.

"6. By means of its wider program, more numerous activities and earlier contacts the pupils are held past the "dropping out" periods between the seventh and tenth grades.

"7. With a larger school unit courses of vocational content may be developed more fully for the senior high school pupils.

...  
 "The school assembly is an important factor for a six-year school. . . .

"A gymnasium is practically necessary to carry out the physical education program for high schools. . . .

"The school building should become a community building to the extent that many of the activities should center there. . . . The Public Library should be located in the school building with a suitable room for group meetings. . . .

"Any town with a small class "A" school should consider reorganizing on the six-year school plan."

(The above is taken from the State High School Manual of 1929.)

The citizens of the town of Wells would greatly profit by the development of community spirit in the use of a community Junior-Senior building. Citizens would look to the new school building, to use its assembly hall, rooms for club activities, and school library. The advantages of such an institution are very numerous. The objections, after the first expenditure, to centralizing schools in this portion of the town have been reduced to the vanishing point by the development of better roads, the use of a snow plow in winter, and the improved motor bus transportation. Transportation facilities provided in the past year have been the best in several years, or ever.

#### GENERAL

After many years of faithful school service in the town of Wells, Mr. I. H. Storer found it necessary to resign from the school board. Mr. Charles Clark was appointed to complete the term.

In conclusion, I wish to express my appreciation for your co-operation and support during the past year.

Respectfully submitted,

W. E. LANE,

Superintendent of Schools.

## REPORT OF HIGH SCHOOL PRINCIPAL

To the Citizens of Wells:

Wells High School began the year 1928-29 with an enrollment of sixty-seven pupils. At the present time we have sixty pupils. The number of pupils next year is expected to be larger.

The present teaching staff is exceptionally fine. Every effort should be made to keep these instructors because it is always an unfortunate incident in a pupil's education to have to change teachers every year or two.

The "course of study" recommended by the State Department of Education is being given as far as the school system allows. Wells has, however, the old type of school system and consequently we cannot give the broadest course. There is a distinct need of placing the seventh and eighth grades in a unit with the present high school pupils if the best results are to be obtained. I feel that your present elementary system is woefully weak in preparing pupils for high school. This can be remedied by placing the seventh and eighth grades in a unit with our present high school and in this way more time will be had for intensive preparation. At the present time the greater part of the pupil's first year is spent in preparing him for high school work.

Athletics have played an important part in our school program this year. The Athletic Association was left almost two hundred dollars in debt from last year but this has been nearly cleared and we have played schedules in football and basketball. Although our teams have not been victorious in many contests I feel satisfied that the pupils have gained by the sports.

The library has been put in as good condition as our funds would allow by Miss Weymouth. The library has come to be recognized as an essential part of the school equipment. The rapid extension of the high school program into a variety of fields and the newer methods of approach to subject matter demand a much wider scope of library facilities than in the past. The state recommends \$1.50 per pupil be spent on library equipment. This amount may be reduced when the school is able to show that a good working library has been provided.

The present building is far from good but I hope that we shall have a new building before long, as Wells cannot stand still along this line while so many neighboring towns are progressing. This new building will take care of the grades seven to twelve inclusive, providing the pupils with modern educational equipment.

The school has been placed on the New England College En-

trance Certificate Board. This allows the principal to recommend pupils of ability to colleges in New England.

Several speakers of note have addressed our assemblies. We have also had many fine musical programs.

The musical clubs have given an operetta and expect to give another later. Prize speaking, dramas, socials and outings will come this spring. The Senior Class is planning on going to Washington after their graduation in May.

I think the town should raise funds to promote athletics. At present all money has to be raised by the school. This puts athletics on a money basis which does not pay in school sports. If a little money was provided there would be more physical training and less physical straining.

It has been a real pleasure to work here at Wells with pupils, parents, teachers and school officials. I sincerely wish to see your school system reorganized in an up-to-date way for the school year of 1929-30. Let us all have for a slogan: "Wells schools are good schools." I wish to take the opportunity here to express my hearty thanks to all who have so ably supported Wells High School. I shall try to merit your approval in the future.

Respectfully submitted,

F. N. EATON, JR.

Fifty-fifth—To see what action the Town will take in regard to the payment by the Ogunquit Village Corporation of the money due to the Town of Wells from said Village Corporation, for cost of the Ogunquit Elementary Schools, which are now past due and remaining unpaid, under petition of Fred W. Bayley and sixteen others.

Fifty-sixth—To see if the Town will vote to install an automatic stop signal at Wells Corner and raise money for the same, under petition of J. W. Dinsmore and others.

Fifty-seventh—To see what sum of money the Town will vote to pay its different Town Officers for the year ensuing.

Fifty-eighth—To see if the Town will authorize the Selectmen to hire money in conjunction with the Town Treasurer in anticipation of taxes at a rate not exceeding six per centum per annum.

Fifty-ninth—To see if the Town will vote to raise the sum of twenty-five dollars (\$25.00) to be used as prizes for the Boys and Girls Agricultural and Home Economics Clubs of the Town of Wells, under petition of Fred W. Bayley and others.

Sixtieth—To see if the Town will grant and vote to raise the sum of two hundred dollars (\$200.00) to be expended for repairs on the road at Wells Branch, beginning at the Sidney Littlefield place, so-called, and running about three-quarters of a mile in a north-westerly direction to Gowen's Crossing, so-called, on the Eastern Division of the Boston & Maine Railroad.

Lastly—To transact any other business that may legally come before said meeting.

The Selectmen hereby give notice that they will be in session at their office in Wells, for the purpose of correcting the list of voters, on March 9th, 1929, from one to four o'clock in the afternoon.

Hereof fail not to make due service of this warrant and a return of your doings thereon, at the time and place of this meeting.

Given under our hands this twenty-fifth day of February, Nineteen Hundred and Twenty-Nine.

JOEL H. PERKINS,

ARCHIE H. WORMWOOD,

GEORGE R. SPILLER,

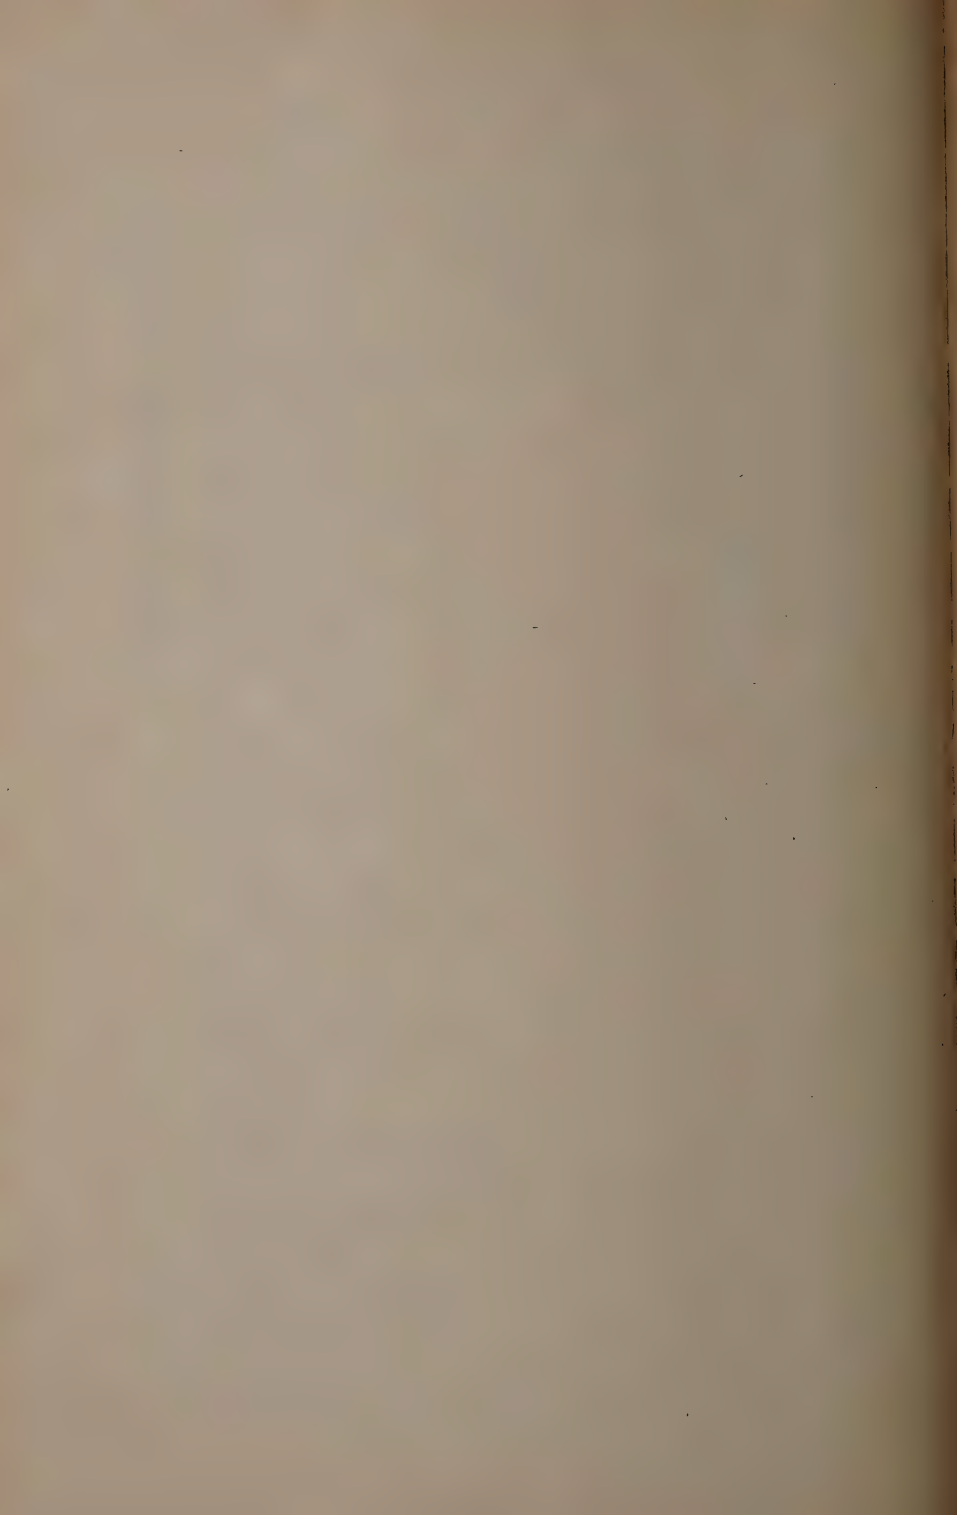

Selectmen of Wells, Maine.
